

ABSTRACTS OF THE DISCLOSURE

Amendments to the Abstract:

Please replace the Abstract with the following rewritten Abstract:

B² -- A computer drive securing system comprising a chassis for receiving and supporting a computer drive unit by one or more securing clips. The chassis includes one or more pinholes and one or more clip mounting features. The securing clip includes one or more securing pins and one or more flexible tabs for engaging the pinholes and clip mounting features of the chassis, respectively. The pins project into a screw hole or the like in the computer drive for releasably securing the computer drive to the chassis.--
